This program provides financial assistance to customers wishing to purchase water-conserving high efficiency urinals for their home or business. The City of Hays does not endorse or recommend specific brands, products or dealers. Selection and installation of the appliance is the sole responsibility of the applicant, as is determination of the adequacy and compatibility of their existing plumbing system. The City assumes no responsibility for any damage that may occur to an applicant's property as a result of participation in this rebate program. Due to circumstances beyond its control, the City cannot guarantee that the installation of the high efficiency urinal will result in lower utility costs.

City of Hays Utilities Department High Efficiency Urinal Rebate Program

Eligibility:

All properties served by the City's water system with existing urinals are eligible for rebates. Rebates are only available for the replacement of existing urinals. No rebates are available for expansions.

All urinal installations must be completed by a licensed plumber or in-house maintenance staff and a City plumbing permit must be obtained.

Newly installed urinals must flush at 0.13 gallons or lower and be EPA WaterSense labeled. More information, including eligible models, can be found at <http://www.epa.gov/watersense/products>. A complete high efficiency urinal system, including a compatible fixture and flush valve, must be installed to be eligible for this program. Waterless urinal installations are also eligible for this rebate.

Costs:

There is no cost to participate in this program. Fees for plumbing inspections on urinal installations are waived for participating properties. Note that fees for additional plumbing work still must be paid (as in the case of a complete remodel).

How to participate:

Make an application for a plumbing permit for urinal replacement and properly install an eligible urinal. No invoices or receipts are required to be submitted.

Payment:

Payment will be made to the owner of the property after a city inspector has ensured proper urinal installation. Payment for urinal replacement is \$300, regardless of cost to the owner. Automatic flush valve, etc., are not eligible for a higher rebate.

The amount of rebate paid to an individual property owner is not capped, with the exception of fund availability. If a property owner changed out 10 urinals, assuming sufficient funds are available, they would be paid a \$3,000 rebate.
