

# Be A Leak Detective!

## Check Your Toilet for Silent Leaks

Toilets are one of the biggest water users. If there is a leak, you may not even know...it could be wasting water and costing your family money! Does your toilet have a silent leak? Follow these simple steps to find out:

1.

Put one dye tablet (or two drops of food coloring) into the toilet tank.

**DROP**

3.

**Repair  
or  
Replace!**

If your toilet has a leak, it can be repaired or replaced with a high-efficiency toilet. If you live in Hays, you can take advantage of the City's toilet rebate program. For more details, visit

[www.watersmarthays.com](http://www.watersmarthays.com)

**REPAIR**

2.

Wait 20 minutes and look in the bowl. If the water changes color, you've got a leak.

**LOOK**

4.

Congratulations! By being a leak detective, and finding just one leaky toilet, your home can be more water efficient!

**SAVE**
