

Nominations Sought for 2019 WaterSmart Landscape Awards

Do you know of a local resident or commercial property with a landscape that exemplifies what it means to be WaterSmart? -OR- Have *you* worked hard to create your own landscape that follows WaterSmart principles? If the answer is ‘YES!’ then consider submitting a nomination for a 2019 WaterSmart Landscape Award! If *your* landscape is WaterSmart, don’t be shy; nominate *your own* landscape for consideration!

Since 2016, one residential and one commercial property has been chosen to receive a WaterSmart Landscape Award. The goal of this award program is to increase awareness of the importance of water conservation in the landscape and to recognize those in the community that have made great strides towards that effort.

A WaterSmart Landscape involves more than just watering plants correctly - it is actually the combination of several gardening principles that *together* create a landscape that not only conserves water but is creative and beautiful as well. The principles of a WaterSmart Landscape include:

- Planning and Design
- Soil Preparation
- Right Plants in the Right Place
- Practical Turf Areas
- Efficient Irrigation
- Proper Mulch
- Proper Maintenance

For details about WaterSmart landscaping principles, visit www.watersmarthays.com

To nominate a WaterSmart Landscape for consideration simply fill out and submit the attached form no later than **June 14, 2019** to Holly Dickman, Water Conservation Specialist.* Finalists will be contacted to schedule an on-site visit. Winners will be notified by July 5th and will be presented with a landscape plaque and a certificate during a regularly scheduled Hays City Commission meeting in July.

**Submit nomination form to Holly Dickman, Water Conservation Specialist, 1002 Vine St., Hays, KS 67601
